Young Scientists
Leiden2022

EU Contest for Young Scientists – Leiden2022

This year, Leiden proudly hosts the 33rd edition of the EU Contest for Young Scientists (EUCYS). We welcome 132 Bright Young Minds, selected from over 65.000 participants from all over the world. These young finalists from 33 countries will take part in the big European finale: the EU Contest for Young Scientists (EUCYS).

During the week of 13 to 18 September 2022, the city will be swamped with young international talents (14-20 years old). On 15 and 16 September 2022, the contestants present their projects to a jury composed of 21 scientists from different countries. We welcome you to visit the contest area of EUCYS2022 in the Hooglandse Kerk together with your classmates on the 15th or 16th of September. During your visit, you can visit both the contest area and the Bright Minds Playground.

We are very excited that you will be visiting EUCYS2022 together with your classmates and we are curious to hear which projects draw your attention. We invite you to visit the stands of two projects you like and ask the contestants questions.

**WHICH PROJECTS
WOULD YOU LIKE
TO VISIT?**

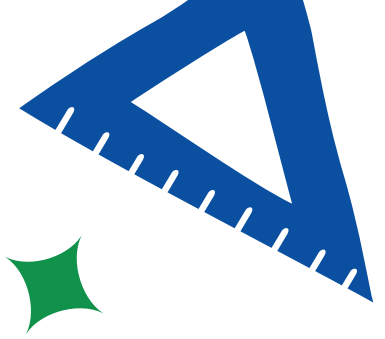

Go to the project database online and choose a maximum of 2 projects out of a total of 85 projects.
